- Revision/Amendment
- Renewal
- Continue Review
- Search
- Version Control
- 21 CFR Part 11 Compliance
- Agenda
- Meeting Minutes
- Generic Report
- Facility Planning
- Study Design
- Test Data
- Animal Procurement
- Quarantine
- Data Collection

**IACUC**

**Research Administration & Clinical Compliance Software**

eProtocol is designed to streamline the protocol management process and is based on the flexible workflow processes that are adaptable to your organization.

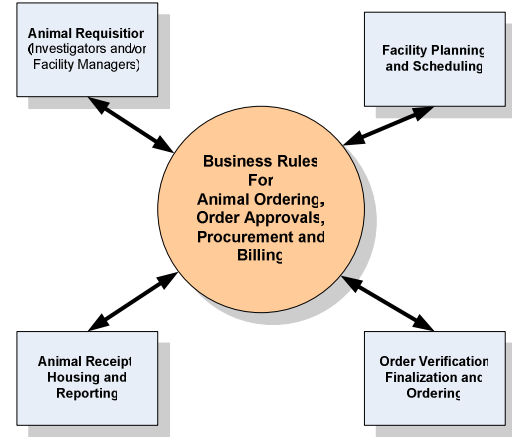

**eProtocol Architecture**

## eAnimalOrdering helps IACUCs in

- Animal Requisition
- Facility Planning and Scheduling
- Order Verification and Finalization
- Billing

An integrated record keeping software application for animal care technicians, veterinary technicians, veterinarians, and investigators will enable easy and error-free record keeping and reporting.

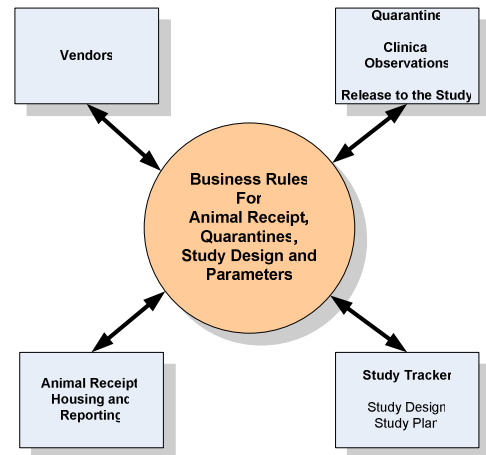

eAnimalOrdering is integrated and interfaced with eProtocol for IACUC protocol processing and eStudyTracker, so that the protocol specific species and animal order details are seamlessly available. Information for cage management and cage cards also can be generated. Appropriate interfaces to existing software systems can also be provided.

## Core modules are:

- **Animals – Request Form**
- **Animals – Quarantine**
- **Animals – Study**

eStudyTracker includes the ability to define and follow the study plans and designs, which would then be used to determine the process flow for study activities.

eStudyTracker can also be provided on PDA and TabletPC for the convenience of the data entry and analysis either in the laboratory or at the study location.

## Why Key Solutions

Key Solutions has been a pioneer of specialty field applications since founded in 1991 in Santa Clara, California. The company gained a reputation for innovative and reliable IT custom services. Over the past six years Key Solution's focus has been in health care and life science applications that are richly comprehensive, customizable, scalable, and web-based.
