- Lab Animal Management Software
- Research Administration Software

Integrated Software Solutions for Life Sciences Research

Key Solutions helps organizations conduct timely, high quality research by providing integrated, web-based comprehensive software solutions for Research Compliance, Lab Animal Management, Research Administration, Grants Management, Conflict of Interest, and Clinical Trials.

Whether you conduct research at a university, hospital, pharmaceutical company, biotech firm, government facility or an independent lab, we have software solutions for your success. Complete end to end solution... so you have that extra edge.

Our products simplify complex processes while reducing administrative costs and delivering the information technology solutions necessary to ensure conformance with regulations and policies.

Key Solutions products and professional services help you:

- Achieve regulatory compliance
- Enhance human and animal subjects protection
- Manage time of researchers and staff
- Manage research facilities
- Integrate and exchange data
- Manage multi-site studies
- Secure access—any time and anywhere
- Online submission, routing and approval

SERVICES

Streamline and automate the entire research process

Our comprehensive project management services enable you to remain focused on research while saving on costs and resources associated with administration and process. The Key Solutions Integrated Research Administration and Compliance System adapts to your facility's processes and workflow. Backed by proven methodologies and best practices, our services include:

- Project Management
- Implementation
- Testing and Validation
- Training
- Third Party System Integration
- Data Migration
- Annual Maintenance and Support

To provide ongoing support for your system and research projects, we offer Hosting, Remote Maintenance, Help Desk Support and Custom Development.

Key Solutions also provides comprehensive IT professional services delivered by an experienced team of software architects, project managers, technical leads, business analysts, and software analysts/programmers. Services include: Custom Application Development, System Integration, Project Management, Help Desk, IT Maintenance, and Application Hosting.

We deliver cost effective services by offering a combination of choices of Onsite, Offsite, or Hybrid development models.

PRODUCTS

The Key Solutions suite of products is based on an open architecture that easily integrates with other systems. Dynamically configurable forms and workflow management tools allow flexibility in automating the entire research process. The user-centric, platform independent design requires minimal training and provides:

- Greater flexibility
- Robust authentication/authorization control
- Easy, web-based access
- Scalability for future growth
